

SERVICE LABORATORY

The Fermentation Science Institute offers laboratory and analytical services to homebrewers and fermentation-based businesses that make beer, wine, or spirits. In keeping with SIU's commitment to community service, our researchers seek to support the production of consistent, high-quality fermented products by providing analytical services and technical assistance.

The Fermentation Science Institute Service Laboratory is certified by the Alcohol and Tobacco Tax and Trade Bureau (TTB) for the analysis of wine for export for alcohol, total extract, citric acid, total SO₂, residual sugars, sorbic acid, and methanol. In addition, the Service Lab participates in semiannual interlaboratory proficiency testing through the American Society for Enology and Viticulture (ASEV.)

To submit a sample, go to *fermentation.siu.edu* and follow instructions under the SERVICE LAB tab.
